Where Mission Meets Innovation

Tria Federal (Tria) is revolutionizing how federal health and public safety agencies achieve their critical missions.

Combining deep mission expertise with cutting-edge technical and digital advisory capabilities, we deliver end-to-end solutions that help government agencies work faster, grow smarter, and stay nimble in the face of change.

Whether we are modernizing healthcare delivery, advancing value-based care, or enhancing public safety operations, Tria delivers the expertise and value typically found only in the largest firms while maintaining the agility and commitment to innovation that drive meaningful change. We're not just supporting government missions – we're transforming how they're achieved.

Building a Federal Health Powerhouse

With the complementary acquisition of Softrams in November 2024, Tria has created a differentiated organization that comprehensively addresses customers' unique strategy and execution requirements. Our five new integrated service lines seamlessly combine digital advisory expertise with technical excellence:

Results Management:
Helping agencies understand and navigate complex digital and operational challenges while charting clear paths forward.

Integrated Health Optimization:
Leveraging big data and advanced technologies to transform knowledge into action and improve health outcomes.

Next Gen Analytics & Data Management:
Strengthening federal program performance through data-driven insights and enhanced stewardship.

Financial Transformation:
Optimizing non-clinical healthcare operations to drive better outcomes across the care continuum.

Digital Modernization:
Reimagining business processes and customer interactions through agile, human-centered technology integration.

Critical Mission Support

Tria deploys our deep health domain expertise, cutting-edge technical capabilities, and comprehensive advisory services through three focused business units guided by respected industry leaders:

- **Military and Veteran Health:** Providing the Department of Veterans Affairs (VA) and Defense Health Agency (DHA) with solutions that enhance healthcare delivery and improve outcomes for service members, veterans, and their families.

- **Public Health:** Partnering with civilian health agencies, particularly the Centers for Medicare & Medicaid Services (CMS), to drive innovation in value-based care and modernize mission-critical systems.

- **Public Safety:** Supporting a wide range of homeland security and defense agencies with technology-enabled solutions that enhance mission effectiveness and operational efficiency.

Technological Innovation

Our technical capabilities span the full spectrum of modern digital services, including artificial intelligence, cloud engineering, agile development, and comprehensive data analytics.

Through our technology innovation group Tria Labs and the Softrams App Foundry, we develop and test emerging technologies to solve tomorrow's challenges today. Tria Labs is building strategic relationships with cutting-edge technology firms from DC to Silicon Valley, enabling Tria to leverage advanced tools, platforms, and services to create technology-enabled solutions that unlock value for our customers.

Work with Us

We have seats on a wide range of multiple-award vehicles, including:

- **GSA: STARS III, MAS, COMET, OASIS, OASIS+**
- **NIH: CIO-SP3**
- **VA: T4NG**
- **CMS: SPARC, ACME**

- **DHA: Omnibus IV**
- **FAA: eFAST, ITIPSS**
- **Navy: SeaPort NxG, BUMED OP&R**
